Celestial Splendour

With ten units of wine cabinet standing at the back, the living room is suffused with soft blue lights. This modern setting, in combination with the ingeniously concealed LED illumination, gives the interior of the wine cellar a divine quality. On the outside, it look like the redolent of a starry night sky, the whole atmosphere is lent celestial splendour.

From Idea to Reality.....

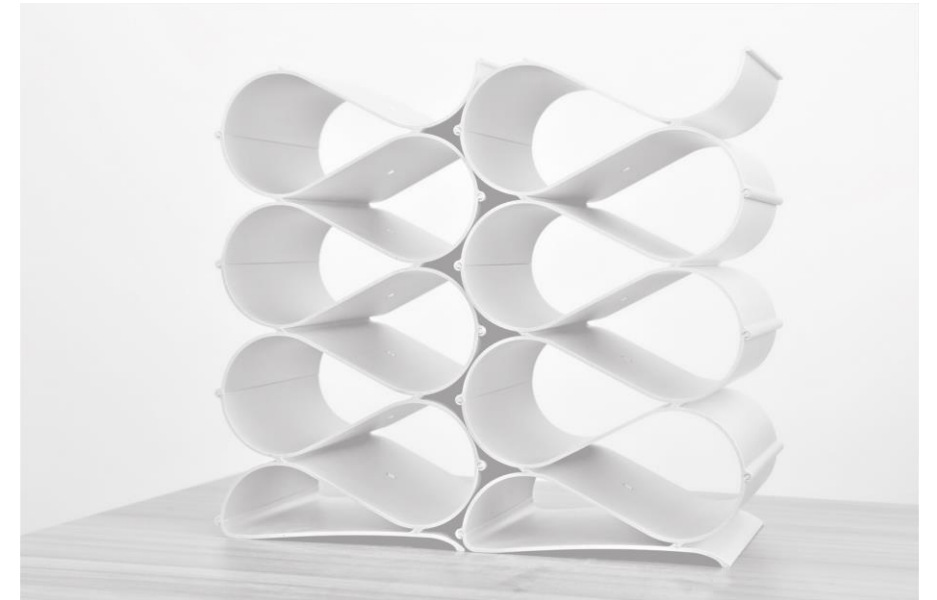

**We actively learn about the needs and attentively listen to our customers.
We produce an ideally-matching design that takes environment, practical attributes, technical considerations and aesthetics into account.**

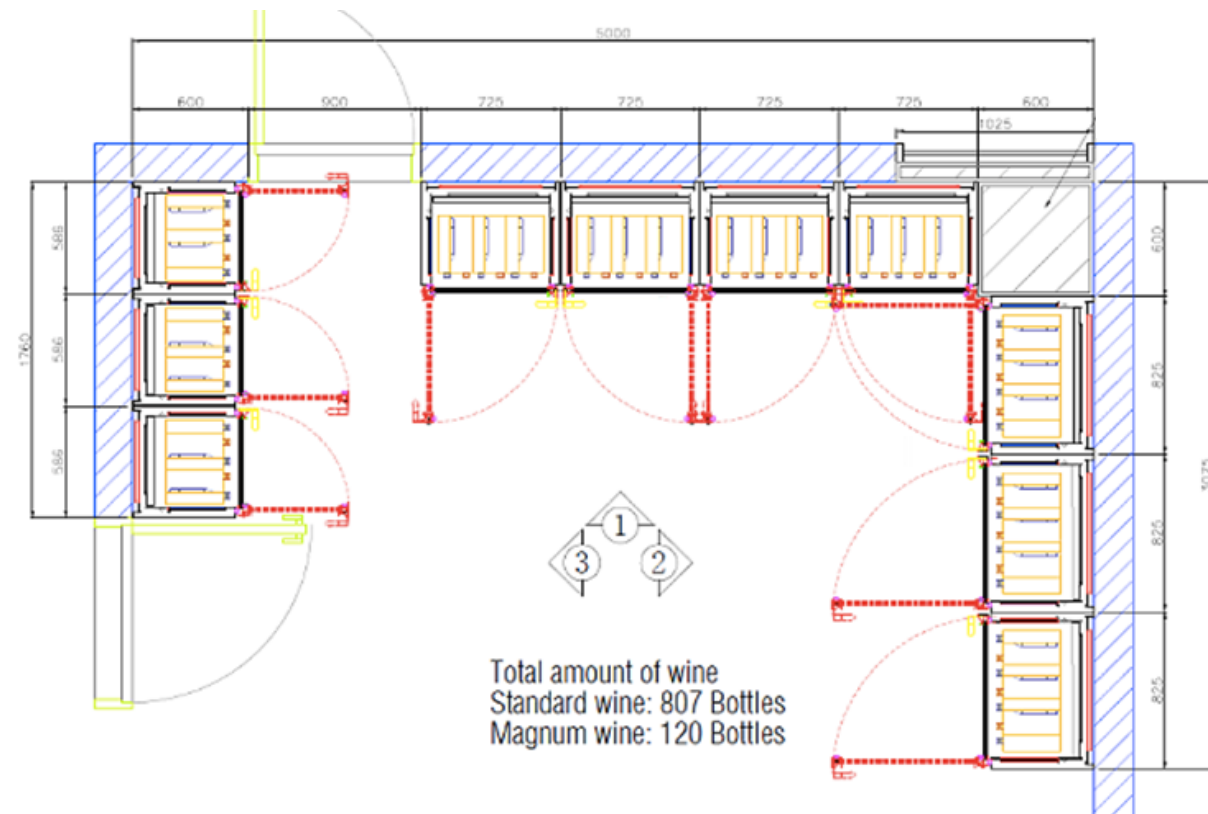

Initially, the main concern of the customer was capacity. She requested the minimum volume should be 1000 bottles. Accordingly, we suggested horizontal wine storage in which the capsules face the front (similar to the pictures below) in order to achieve the highest capacity.

During our meeting with the customer , we showed and introduced to her several different designs. She decided that she preferred a bespoke design to practicality subsequent to our explanation and a professional, mutual consultation.

To balance aesthetics and practicality, two types of wine-rack were proposed at the customer's options, namely **“wave-shaped”** option, and other is **“8-shaped”** option. Both options satisfied customer's request and wants.

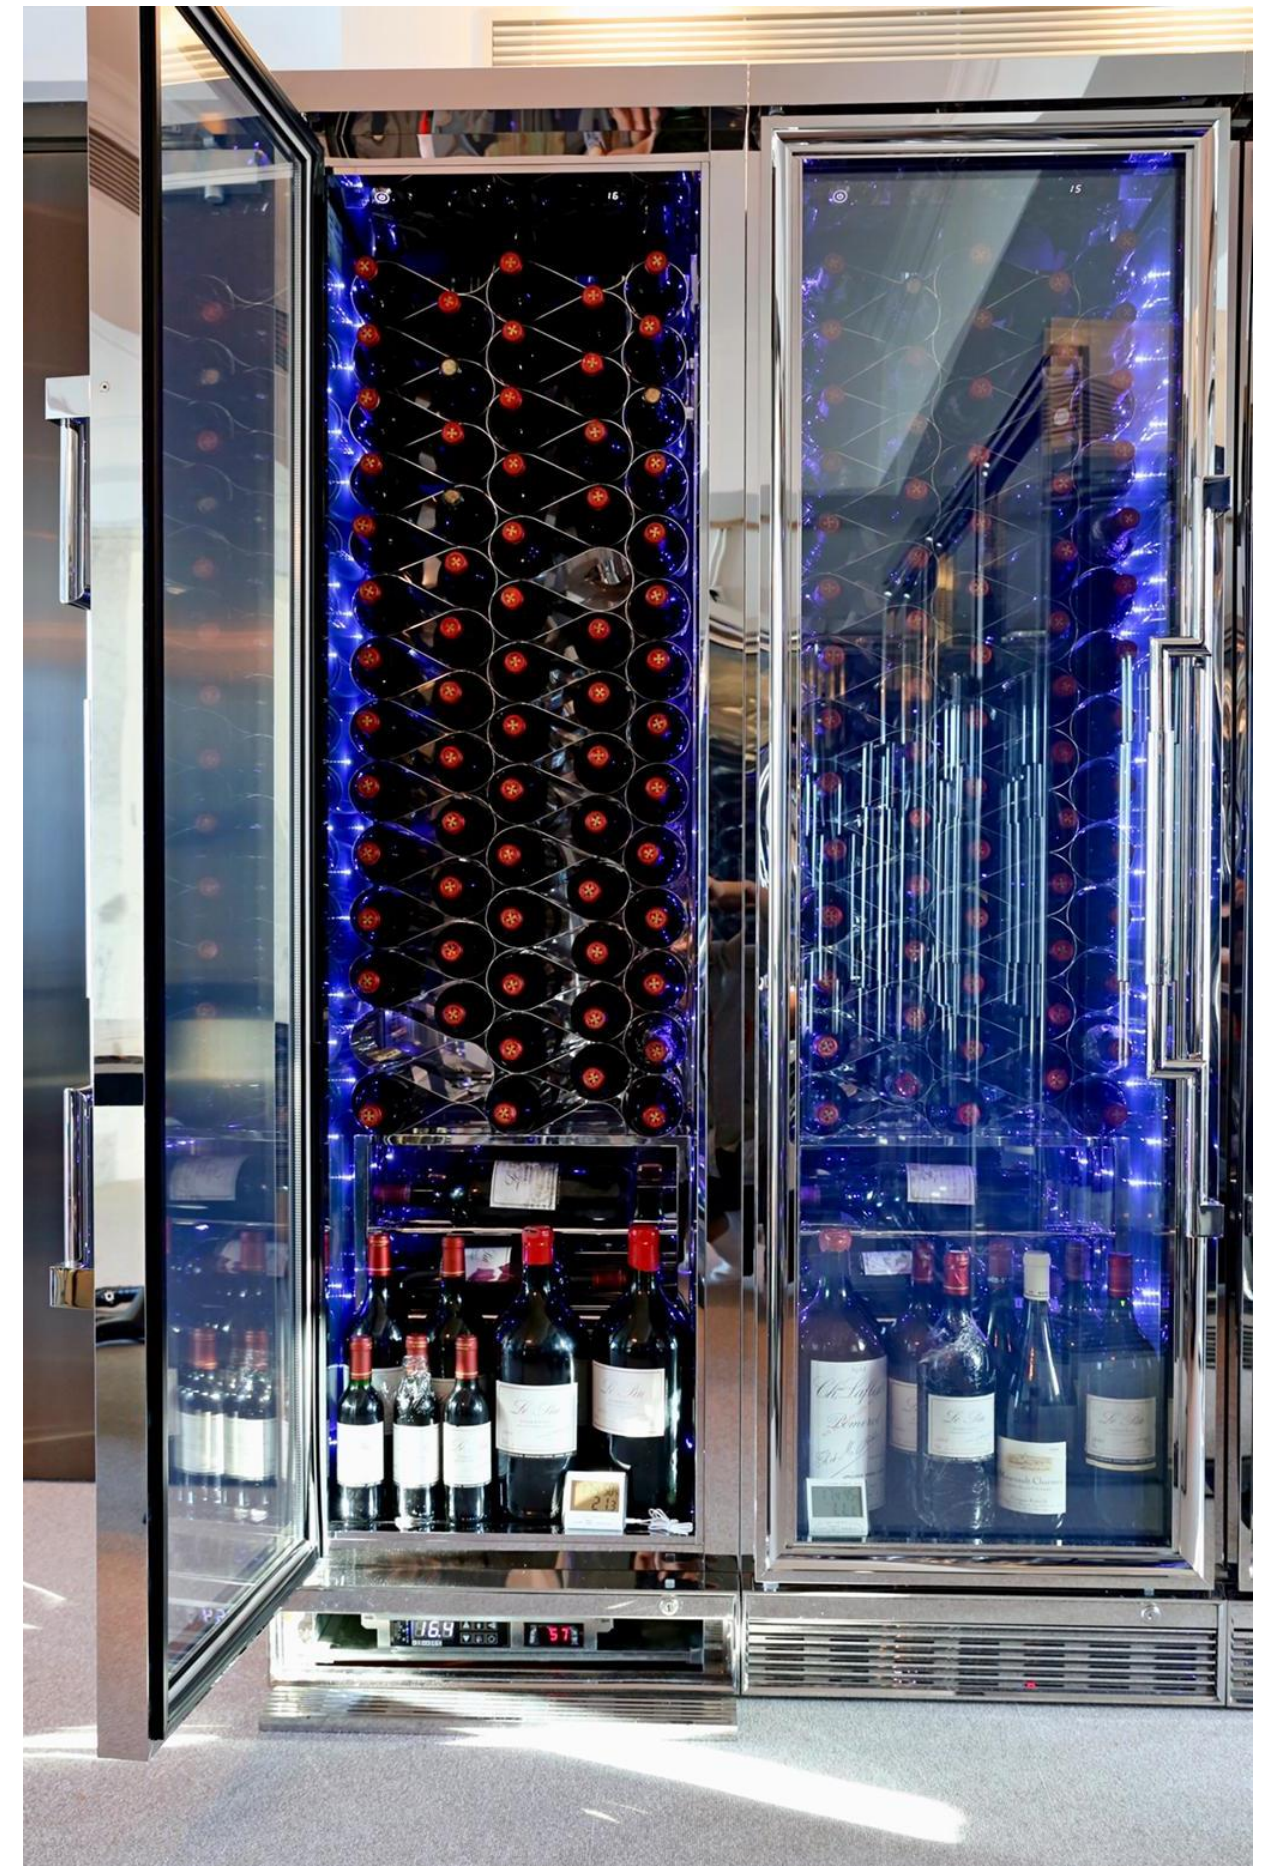

Setting aside the first consideration – capacity. The customer mentioned that her second concern is variety, i.e.. the types of wine that the wine cabinet can contain. As a wine lover, she has many types of wine and collections, e.g. 750 ml standard and 1.5 L magnum.

If the wine racks and wine holding were of the same pattern, the whole cabinet is would be excessively monotonous, especially when there are ten wine cabinets gathered at the same place.

In order to add a personal touch to the cabinets while still satisfying all her requests, the inclusion of vertical wine storage was suggested. Those 1.5 L magnum can be put in the lower part of the cabinet without harming its aesthetics.

Finishing the considerations in relation to the design of the cabinets, we moved on to consider the spatial restriction. Based on the spatial parameters, we suggested that ten cabinets were to be built, aligned in a 3-4-3 arrangement. Every detail was 100% customised to the inch, hence the unique design we proudly offer in accordance to the customer's preferences and needs.

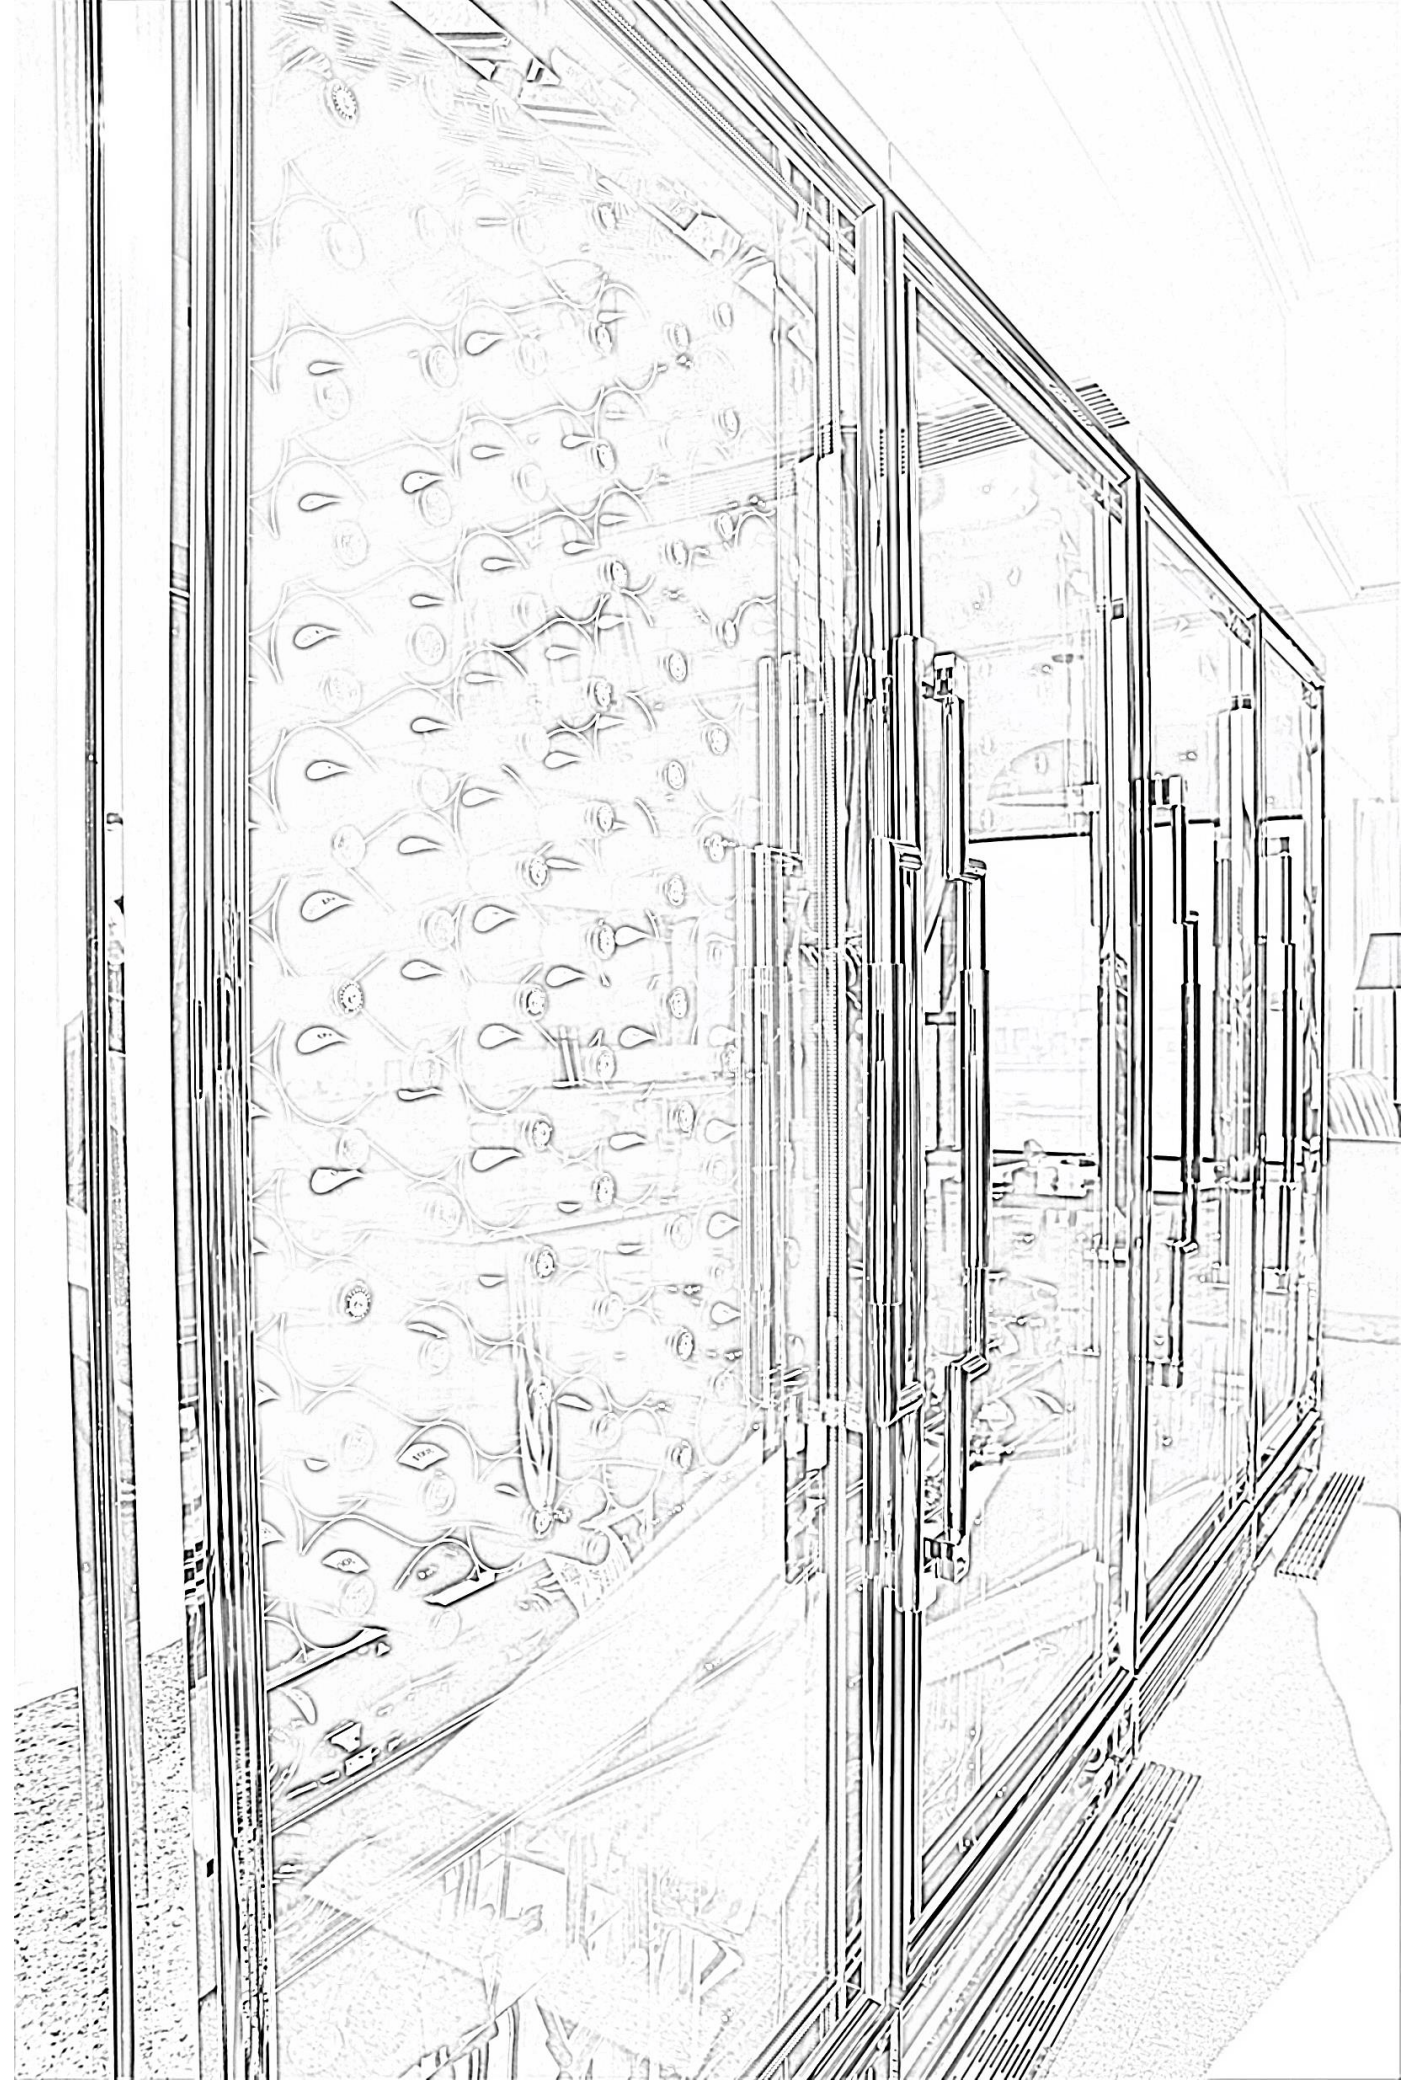

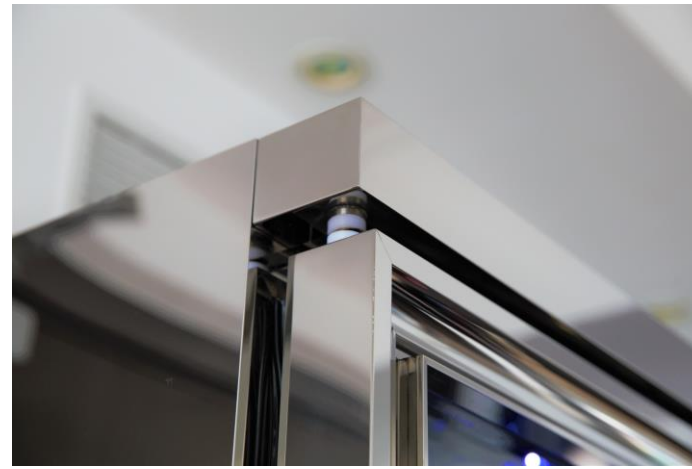

Flamboyant Wine Capsules

Visual pleasure makes the beholder yearn for a closer look. Collections of wine showcased on the stainless steel rack are directly accessible with their labels showing in full and under controlled lighting. The blue lights in the display give a soft glow on each bottle while the flamboyant capsules exquisitely set off the radiance emitted from the lights.

Unique Wine Cabinet
happen

Details Make Perfection

In addition to the holistic design, quality and spatial considerations, we put great emphasis on details.

Unlike traditional straight design, our door handles are considerably created with exquisite attention to detail. We specially made the lever bigger than usual to make it best fit ergonomics, which means the lever is designed in its best shape for the users' comfort and ease. As for other parts of the handle, they are designed in a well calculated way that not only is it in its most user-friendly form, but its appearance is of high artistic and aesthetic quality, making the cabinet a piece of artwork.

Every stainless steel 8-shaped rack is made by hand by highly skilled craftsmen instead of machine-made, and therefore every rack has its own, if you like, character. There is always a tinge of uniqueness even with the details that only seem to follow the same pattern.

As for the finish of the cabinet, the smooth mirror finish on the stainless steel is absolutely satisfying to behold. With the flawless techniques and scrupulous attention to detail, a unique, gleaming and artistic cabinet is created.

Practicality Together with Aesthetics

The cabinet is designed to store a variety of bottle sizes. Other than horizontal storage, vertical storage is also adopted in the designed. Wine bottles are put vertically with the front labels facing outwards.

“As wine cellar specialists, we create perfect ambiance for enjoyment, taking the project from concept to completion. You dream it, we make it.

Do get in touch with our team of professionals, who would be delighted to assist you.”
